OTHER SOURCE(S): MARPAT 133:198387

AB The present invention relates an opaque or clear conditioner which comprises a monoalkyl quat from C14 to higher carbon chain lengths (preferably C16 to C22) and a dialkyl quat from C14 to higher carbon chain lengths (preferably C16 to C18). Also included is a silicone compound and an emulsifier. Also optionally included is an amount of fatty alc. necessary to opacify the conditioner. The monoalkyl quat is necessary in a ratio to the dialkyl quat of about 15:1 to about 2:1. The fatty alc. is optionally present in an amount from about 1 % to about 4 %. A **hair** conditioner contained cetrimonium chloride 2.8, distearyldimonium chloride 0.15, cetyl alc. 3, DC 2-1787, and excipients q.s. 100%.

AB There is described a conditioning composition for conditioning, lightening and highlighting **hair** which comprises: (i) a peroxy compound; and (ii)

a conditioning agent, said composition having a pH of ≤ 5 . There is also described a method for conditioning lightening and highlighting **hair** which comprises treating the **hair** with a composition of the invention. Thus, a composition contained hydroxyethyl cellulose 1.30, PEG olealmonium chloride (69%) and propylene glycol (31%) 2.50, propylene glycol 1.50, cetrimonium chloride (30%) 2.00, liquid citric acid 50% 1.00, Quaternium-80 50% 2.00, FD&C Blue Number 1 (1%) 0.05, disodium EDTA 0.10, Kathon CG 0.05, DMDM hydantoin 0.10, fragrance 0.40, Polysorbate-20 0.40, and H₂O₂ 35% 4.00% and water qs.

AB	The present invention relates an opaque conditioner which comprises a monoalkyl quat from C16 to higher C chain lengths (preferably C16 to C22) and a dialkyl quat from C20 to C22. Also included is an amount of fatty alc. necessary to opacify the conditioner. The monoalkyl quat is necessary in a ratio to the dialkyl quat of about not less than 4:1. An example composition contained cetrimonium chloride 30% active 2.8, didocosyldimethylammonium chloride 0.21, and cetyl alc. 3.0%. The fatty alc. is present in an amount from about 1 % to about 4 %.

PRIORITY APPLN. INFO.:			US 1993-63015	A 19930517
AB	A conditioning shampoo containing an anionic surfactant, a long-chain fatty alc., a cationic polyethyleneimine, and optionally a non-volatile silicone material has extended product stability, excellent cleansing and foaming properties, and provides excellent and improved overall conditioning to human hair, particularly superior wet and dry combing properties. A shampoo conditioner contained 50% polyethyleneimine 1.00, Dynol-120 33.40, cocamide MEA 1.00, Liquid 50% citric acid, 1.35, Kathon CG 0.05, DMDM hydantoin/glidant 0.10, and water 63.10%.
